Meeting with Sinai

Look @ Blackwell's stuff

Discuss Goals for Workshop

Github clone of Sinai's work

converted .tsv to .cex for DUCAT compatability

uri:cts:*namespace*:^{Bio hierarchy}*textgroup.work.version.exemplar:citation hierarchy:

travelab : petachia.itinerary.heb.token: claus.token number

no cononical grouping (i.e. lines, versus, etc) only pages

Discussion new devel files w/ different breakdowns

more specific/meticulous the .xml styles fit the easier the alignment

derivation from "FINAL" .xml file

heb: = eng.

heb. = eng.

heb, = eng

LATER:

↳ add map for the alignment piece with "GeoNar#"

↳ Keep page breaks, headers, & page breaks (for Hebrew addition)

• more easily cited and blocked section

↳ Keep additional formatting with the recogito <placename>

↳ resolution for recogito data

↳ advance DUCAT with shortcut for alignment save or alignment button hovers on screen and scrolls with you?

↳ Separate Place Name from prefix to allow ind. tokenization alignment

Agenda for next meeting: February 18th 9am

Sam Blackwell

4pm Haifa

↳ Set up Github repo & post

↳ Hebrew prelim view .ccx w/ Asher

↳ Sinai: manipulate original Hebrew and English for break points/canonical annotation

↳ Manipulate DUCAT for advancements

↳ Setup Zoom meeting for 18th
